INTRODUCING
THE AMWELL[®]
CARALERT
SECURITY SYSTEM™

Bringing Together
State-of-the-Art
Auto Alarm
&
Cell Phone Technology
for the
Complete Protection
of Your Car

The Car Alert Security System™...

...just made all other auto security systems obsolete! This innovative technology brings together the latest cell phone advances with a multi-functional interactive car alarm system. There is nothing like it anywhere!

Now it is possible to communicate with your car from wherever you are—using any telephone you choose—and have your car communicate with you. Your car will call to tell you—in a human voice—if there is a burglary attempt, accident or other emergency and allow you to disable the engine, lock doors and speak to occupants of the car no matter where you are—even overseas!

It is almost impossible for a car protected by an Amwell® Car Alert Security System™ to be stolen, started without authorization or taken for a joy ride. And the alarm will always transmit the car's location. The system is user-friendly and easy to operate. Technical assistance is available free 24/7.

If anything goes wrong with your car and you are not present, the alarm system will report the incident and the location of the car to you wherever you are. You can then interact with the car occupants by listening to what is going on inside of it, locking or unlocking car doors, notifying police—and even stopping or starting the car's engine.

In case of emergency, a driver can use the alarm's silent panic button to call police or others for help, or use the built-in hands-free cell phone to communicate with others.

And best of all, the Amwell® Car Alert Security System™ is priced below many other car alarm systems, even though none come close to matching the features offered by this unique new technology.

To fully insure your auto investment, protect it with an Amwell® Car Alert Security System™, available exclusively by calling a security specialist at **516.586.8327** or visiting www.amwellsecurity.com.

AMWELL®
SECURITY SYSTEMS INC.
State-of-the-Art Automotive Security

Amwell's® innovative Car Alert Security System™ is the result of several years of intensive research by a team of dedicated specialists in electronics and security systems. It is their belief that advances in cell phone technology enables the marriage of the telephone and alarm systems. The result of their work is a comprehensive car alarm that notifies you of emergencies and allows you to access the alarm's controls wherever you are, simply by using any telephone.

Now, Amwell® Security Systems is continuing their research to bring this technology to other forms of alarm systems. Watch for other revolutionary security products, soon to be introduced by Amwell® security specialists.
